

# Reseller and Multi-site Hosting

**The Alentus MultiPlan lets you easily manage multiple websites - so you can spend more time designing and building web applications.**

## Take Control of Your Hosting

As a web designer or programmer, you need a hosting environment that puts you in total control. You need to be able to manage multiple sites, configure server options, permissions and user settings quickly and easily and you don't have time to wait for your web host to make these changes for you. Your time is valuable and your talents are best spent creating new designs, coding applications and communicating with your clients. You need to take control of your hosting, not the other way around.

## Save Time and Money with a MultiPlan

The Alentus MultiPlan gives web designers and hosting resellers the most comprehensive single account package to host and manage multiple domains. All of your websites can be setup with a single login and managed with simple, time saving point-and-click routines and unique roots for each site. The best part is that your coding efforts will really shine with ultra-fast Xeon Servers and full platform support for the latest ASP.NET, SQL Server and MySQL technologies and services. The MultiPlan Control Panel provides easy-to-use and straightforward domain level administration for all common site hosting management tasks: set resource limits, manage user accounts, manage services, brand or customize underlying end-user control panels, setup site templates, view reports and much more. Start saving time and money with a MultiPlan from Alentus - backed up by 10 years experience and the best technical support in the business.

*"I also wish to say thank you to the Alentus team. The service provided has been faultless. Some of the people we work with think it is strange that we host our site with a provider half a world away, but we have much less problems than they do."*
