

Website, Email and Database Hosting

Complex Hosting Without the Complexity

Our full selection of website hosting plans are configured to meet virtually any site hosting requirements, and budget. Choose from a complete line of site hosting services and options, with comprehensive support for ASP, ASP.NET 2.0, PHP, SQL Server, MySQL, SharePoint, MS Exchange, DotNetNuke, ColdFusion MX and more.

20+ Web Applications for Business and E-Commerce

Choose from more than 20 web-based business and communication applications that can quickly enhance the value, functionality and usefulness of your website. Our growing suite of website software applications includes an online shopping cart, news manager, image gallery, banner manager, classified ad system and much more. All applications are installed to your website by Alentus technicians and we provide comprehensive technical support to keep you online and keep your traffic flowing.

Add Power and Functionality to your Website

Alentus Hosted Applications are easy-to-use, managed software applications that can add sophisticated new functionality to your website - and increase your business effectiveness. Each application or service is setup on dedicated application servers and all backend services are managed and kept up to date by Alentus personnel. Popular hosted applications include WordPress Blog Manager, Urchin Site Statistics, DotNetNuke Content Management, MediaStream video streaming, DocumenTree and more.

Essential Technical Support

At Alentus, we pride ourselves on providing among the best technical support services in the business. Our support personnel are available around the clock and on weekends and we work with each and every customer to ensure all problems are resolved to our customer's complete satisfaction. We provide an exhaustive collection of help documents and "how-to" guides and our customers can always contact us by telephone, email, LiveSupport and via our online C3 Customer Console.

"I also wish to say thank you to the Alentus team. The service provided has been faultless. Some of the people we work with think it is strange that we host our site with a provider half a world away, but we have much less problems than they do."
